A FIRST DRAFT

OF A FULL PAGE ADVERTISEMENT IN ALL THE STUDENT PAPERS OF SYDNEY UNIVERSITY, THE UNIVERSITY OF N.S.W. AND MACQUARIE UNIVERSITY, AND AN ABRIDGED AD ON THE LEADER PAGE OF THE SYDNEY MORNING HERALD AND THE AUSTRALIAN.

(In the following text those words in very large type cannot be shown as this typed text is bound by one type face only, but the large type words are typed herebelow in spaced capitals, and the appearance and effect can be imagined).

A C H A L L E N G E

TO EVERY PROFESSOR, EVERY SCIENTIST, AND
EVERY TEACHER, LECTURER, POST-GRADUATE AND
UNDER-GRADUATE STUDENT AT ALL UNIVERSITIES

made by C.K.Bliss, a Scientist in Rebellion, proving that our wise men of mankind have grotesquely and catastrophically overlooked what every bright boy and girl of 7 years of age can see and understand (once it has been pointed out to them) namely

THE FORGOTTEN FORCE OF NATURE

and

THE FORGOTTEN SCIENCE OF MAN

Our professors and scientists are teaching us that Nature presents itself in

THE TWO ASPECTS OF NATURE governed by THE TWO FORCES OF NATURE

MATTER and ENERGY acted upon by GRAVITATION and ELECTROMAGNETISM

But there is a THIRD ASPECT and a THIRD FORCE of Nature working in our Universe. Can we see it's working? Yes. Every child can see it once it has been pointed out to it. A child knows nothing of Gravitation until you explain it. A child knows nothing of Electromagnetism until you demonstrate it. Why haven't our wise men not told us of that third Aspect and third Force of Nature? Because of that forgotten Science of Man.

Now, don't be afraid! Bliss is not going to give you a philosophical Blabla, nor a religious Blabla, nor a scientific Blabla which could mean anything (or nothing). Bliss is an industrial research chemist. He has taught himself to teach in simple language factory girls and tradesmen, clients and customers the working of protons, electrons, ions, etc. in the electronic tubes he manufactured. He will tell you in simple language what every child can understand about that third Force of Nature and that forgotten Science of Man.

What is this forgotten Science of Man? It is one of the oldest sciences, and surely the most dangerous science of all. Most of its practitioners have died a violent death, and in bygone times - and in our times millions of men have died because they dared to practise that forgotten science.

And this is why today there is not one chair on any university around the world where that science is, or should be taught. Because the professoriates and senates of all universities conveniently forget that most dangerous science - for obvious reasons. In democratic countries the university men are fearing for their livelihood, and in despotic countries the university men are fearing for their lives to teach and to practise that dangerous science.

But Bliss was not afraid. And hence he was shipped off to the extermination camps of Dachau and Buchenwald, and when he escaped alive, the Japanese thought police caught up with him in Shanghai and confiscated his manuscripts. Only the arriving allied forces saved his life. And he is not afraid to practise and publish his findings here in Sydney, though he has already received death threats over the telephone (investigated by the P.M.G. Department and the Criminal Investigation Branch).

COME ON, YE HAPLESS AND HELPLESS STUDENTS LISTEN AND LEARN THE DREADFUL FACT THAT WHAT OUR WISE MEN ARE TEACHING US IS ALREADY OUT-DATED AND NOT TRUE. LISTEN AND LEARN OF THAT FORGOTTEN FORCE OF OUR UNIVERSE THAT GIVES US THE ANSWER TO THE

ILLS OF OUR SOCIETY, THAT GIVES US A BREATH-TAKING HOPE FOR OUR FUTURE. ONCE YOU HAVE SEEN AND GRASPED THE WORKING OF THAT THIRD FORCE AROUND YOU AND EVEN WITHIN YOUR OWN BODY, IT WILL SHAKE YOU TO THE CORE. IT WILL CHANGE YOUR LIFE.

COME TO THE FREE PUBLIC LECTURE

at Lunch Time (punctual 1 to 2 p.m. for students only) and on the same evening beginning at 7.30 p.m. for Everyone (with crossfire of counter arguments, etc.) on the following days:

At the University of Sydney, Wallace Theatre on the date.....

At the University of N.S.W., Science Theatre on the date.....

At Macquarie University Great Lecture Hall on the date.....

Now read what they say about Bliss, and be sure of a fantastic lecture:

Bertrand Russell: "Bliss' work.... an important service to mankind."

Julian Huxley: "Bliss' work... provides something of real importance."

Prof. Oliver L. Reiser: "Bliss heroic work..." (to the American Association for the Advancement of Science).

Prof. R. Buckminster Fuller: "Bliss has done some extraordinary fundamental thinking."

Prof. Lancelot Hogben: "Fascinating."

Prof. A.G. Mitchell (now Vice Chancellor of Macquarie University) when he presided at Bliss' first Lecture at the Wallace Theatre on a quite different aspect of his work: "We have been charmed and fascinated"

Students of Sydney University in Honi Soit and Union Recorder: "You couldn't forget having heard Bliss. He delighted his audience."

But others think otherwise about Bliss

The Communist Review of Sydney: "The Invention of an Obscurantist"
"The latest Charlatanry of philosophical Idealism."

The Scholar who sponsors this Lecture is a Member of the Parliament of Australia and a Graduate of Sydney University. He is

DR. DOUGLAS NIXON EVERINGHAM M.P., M.H.R. M.B., B.S. University of Sydney and
Parliamentary Labor Member for Capricornia, Queensland

who exhorts you to come and listen to Bliss with these words:

"Bliss blitzes the blabla of preachers, lawyers, professors and politicians. He is a sentimental practical scientist in revolt - with a new dogma-free gospel of gladness acceptable to the devastating logic of youth, and people of all creeds or none."

"I don't think you can hear this Dachau and Buchenwald survivor without getting a bit more optimistic about our future."

If Dr. Everingham can free himself at one of the dates above he will come from Canberra and address the audience.

This Announcement is authorised by Dr. D.N. Everingham, Member of the House of Representatives, Parliament of Australia, Canberra A.C.T.
